

How to use extra data?

1. LOG IN YUSHANFANG PLATFORM

Log in Yushanfang Platform with your tianchi account (<http://yushanfang.com>)

Note: please make sure that you have finished your tianchi account verification before logging in the Yushanfang Platform. (Go and verify: <http://tianchi.aliyun.com/> My page -> Verify your account)

2. WORKBENCH

Double click “prj_tianchi_xx_xxxxx” and enter your project:

Projects

Please enter the keyword [Search](#) [All](#) [Exchange area](#) [Private area](#)

Project Name	Project Identifier	Project Owner	Create Time	State
[redacted]	[redacted]	dxp_00000000@aliyun.com	2016-05-04 10:52:16	Normal
[redacted]	[redacted]	dxp_00000000@aliyun.com	2015-11-16 12:26:46	Normal
[redacted]	[redacted]	dxp_00000000@aliyun.com	2015-02-04 11:37:11	Normal

Fail

3. HOW TO USE THE DATA SETS

2.1 CHECK THE DATA SETS

Project data -> Data resource -> Application of data within the organization:

Data resource

The data produced by the project [Application of data within the organization](#) [pls click here](#)

Please enter the keyword [Search](#) ☐ Only show my permission

ODPS Table

your tables

Table Name	Description	Source	The package	Source Project	Operate
ijcai2016_taobao	user data of ta...	天池	View package	tianchi_data (tianchi_data)	Authorized
ijcai2016_koubei_train	koubei train ta...	天池	View package	tianchi_data (tianchi_data)	Authorized
ijcai2016_koubei_test	koubei test tab...	天池	View package	tianchi_data (tianchi_data)	Authorized
ijcai2016_merchant_info	merchant inform...	天池	View package	tianchi_data (tianchi_data)	Authorized
ijcai2016_koubei_train_extra	koubei train ta...	天池	View package	tianchi_data (tianchi_data)	Authorized
ijcai2016_taobao_extra	taobao user dat...	天池	View package	tianchi_data (tianchi_data)	Authorized

3.2 ACCESS THE TABLES ON “DATA DEVELOPMENT” PLATFORM

When access a table, you need to add the project name (tianchi_data) before the table.

For example:

tianchi_data.ijcai2016_taobao.

Or you can copy tables to your own project by:

*create table if not exists ijcai2016_taobao as
select * from tianchi_data.ijcai2016_taobao;*

3.3 ACCESS THE TABLES ON “ALGORITHM DEVELOPMENT” PLATFORM

You can do data preprocessing, statistics, modeling, and evaluation by build-in functions on Algorithm Development.

Note: when doing data analysis on Algorithm Development, you need to first copy all the required tables into your own project. (For the copy method, please refer to 3.2). You are suggested do data sampling before modeling. Please avoid using the full data directly.
